DETAILED ACTION

1. The application filed March 3, 2004 is presented for examination and claims 1-19 are pending.

Allowable Subject Matter

2. Claims 1 to 19 are allowed.
3. The following is an examiner's statement of reasons for allowance: the claimed invention is directed to a driving method of a plasma display panel.

Independent claim 1 identifies a uniquely distinct feature "respectively multiplying erroneous data corresponding to a difference between the first grayscale data and the second grayscale data with preset coefficient values to diffuse the multiplied result to a plurality of pixels adjacent to the pixel, wherein before the erroneous data are respectively multiplied with the preset coefficient values, a random value is multiplied to at least one coefficient value among the plurality of coefficient values".

Independent claim 6 identifies a uniquely distinct feature "respectively multiplying the at least one random value to at least one coefficient value, and respectively multiplying the plurality of coefficient values multiplied with the at least one random value, with the erroneous data".

Independent claim 8 identifies a uniquely distinct feature "at least one random generating means for generating at least one random value to supply the

generated random value to at least one multiplying means among the plurality of multiplying means".

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamada et al. (Patent # 6,556,214).

The closest art, Yamada et al. as discussed above, either singularly or in combination, fails to anticipate or render obvious the above limitations obvious.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
